**Protect Your Investment
 with Pavement Protection**

Seal Coating protects your valuable asphalt pavement and extends it's life for many years.

Seal Coating shields out sun and oxidation while it seals in vital asphalt oils retaining the pavements flexibility and keeps it 'alive'.

Before After

- Seal Coating protects against the softening created by oil and gas drippings.

- Seal Coating seals water out of the pavement preserving internal strength. It keeps the underlying base dry reducing damage caused by base failure.

SEAL COATING your asphalt will leave your asphalt with an attractive satin black finish that will last for many years.
